

1. What is a dental articulator? An instrument that helps reproduce various movements of the jaw
2. Can it reproduce the full range of jaw movements?_ no
3. What is its function? It ensures correct interdigitation of teeth nerovnosti hrbolky and an anatomically Functional biting plane – rovinu okluze

Rovina okluze – jedná se o imaginární rovinu probíhající skrz incizální hrany dolních středních řezáků a hroty distovestibulárních hrbolků druhých dolních molárů. Speeova křivka – linie, která probíhá incizálním hrotem dolního špičáku distálním směrem a lemuje hroty hrbolků distálních zubů.

4. Describe a non-adjustable one Non adjustable/ are not really articulators, simple, reproduce static relationship (of movements) Used for quick and easy organisation
5. Describe a semi-adjustable one , how do we divide them? most Common, allow majority of dental treatments to be carried out, they simulate all mandibular movements. divide them into Arcon articulators and non arcon articulators. It s connected with words mandibular and condyle - hrbolek
6. Describe fully-adjustable one Reproduces the movement of the temporomandibular joints in all dimensions and Functional movements They are used in large and complex restorative cases where a correct occlusion is being restored
7. Explain the process of articulating the denture 12 bodů přeloží sami!!

Otázky k otázce Decay, filling, healthy diet

1. What is a decay? What other names do we use for decay?
2. What causes it?
3. What is plaque and what does it contain? Where does it appear?
4. How does the bacteria work?
5. What are symptoms of decay?
6. What is the diagnosis? – the proces of looking for the decay?
7. What kind of technology can doctors use to detec the tooth decay?
8. What does a decay look like?
9. What is the prevention? How can you prevent it? Reduce it?
10. What is the treatment?
11. What kind of fillings do we use?
12. What happens if the decay is not treated?
13. When should we call a professional?
14. Do you know any other dental diseases? Talk about them briefly(– probereme Periodontitis a Gingivitis)
15. Talk about healthy diet, nutrition, you and dental health

1. Name parts of the upper digestive system
2. Describe oesophagus, what is it, what is its function
3. Name three digestive disorders/ diseases, describe one of them
4. What is bile, where can we find it?
5. Describe two kinds of digestion, where do they take place
